Rental of spaces | Port Olímpic

A port open to the sea, to people and to Barcelona

Inaugurated in 1990, the Port Olímpic was the setting for the sailing competitions during the 1992 Olympic Games. Games that placed Barcelona in the world and marked a before and after in the role of the host cities.

The Port Olímpic is also one of the emblematic elements of the Barcelona skyline.

Memory, heritage and future converge in this reference location which, in this new stage, opens to the sea, the city and the world.

Location and acces

Next to the Port Olímpic, important university and scientific centers converge. It is close to dynamic economic environments, such as the 22@ technological district or the Port of Barcelona.

In addition, it has excellent connections with the public transport network.

Gregal Room - Audiovisual Equipment

- **Microphone system:** This will include a wireless system with two systems, consisting of two handheld transmitters, two beltpack transmitters with headset microphones, and two UHF diversity receivers.

- **Audiovisual processing and distribution:** It will have a processor and amplifier for the audiovisual system, connected to the monitors and boxes distributed throughout the room. In addition, it can be controlled from a portable touchscreen tablet.

- **Sound system:** A set of 3 fixed column speakers will provide optimal sound for events in any of the room's configurations.

- **Content projection system:** This system will consist of two main 86" mobile monitors and two 65" auxiliary support monitors, all mounted on a mobile cart for greater positioning flexibility.

- **Video capture system:** This will be based on three PTZ video cameras, one fixed camera located on the central column and two mobile cameras on the large 86" monitors, connected to the streaming system to transmit the video signal over the network.

- **Streaming:** A system will be installed to broadcast the event (with video and audio signals) over the network.

- **Inductive loop system:** This system will include an inductive loop amplifier connected to the room's audio system, facilitating listening for people with hearing impairments. Three additional auxiliary audio inputs/outputs can also be added.

- **Wireless presentation system:** A wireless presentation system is included, with wireless connection buttons to facilitate the projection of presentation content without the need for cables.

- **Standalone videoconferencing system:** Each small monitor (65") located on the wheeled carts will include a videoconferencing bar, allowing small videoconferences to be held independently in a specific area of the room.
